

# For the highest safety of your goods

# SAFE BAGS

In line with our green footprint strategy, we only offer Blue Angel certified safebags. We are consistent here, because where sustainability is possible and PCR recycled films are available, they must always be used.

We also make no compromises when it comes to tampering security: We only have one type of Safebags, which is the highest security level with a colourindicator for heat tampering attempts and water solubility printing against pre-tampering.

- › transparent and non-transparent coextruded films
- › the entire range of sizes and material thicknesses customary on the market
- › extras such as up to 3 tear-offs next to or on top of each other
- › Variations of perforations
- › document pockets
- › up to 8-colour printing
- › all 1 and 2D barcode types Cash EDI, QR-Code, Datamatrix-Code...

We have a standard range for the cash area, or can offer customization on request.

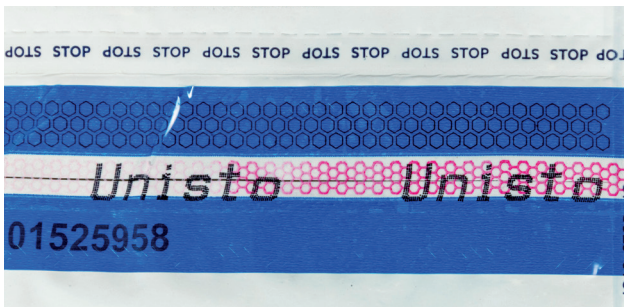

# SAFEBAGS

## Unisto Security Tape

High security level tape  
Unused Safebag security tape with red release liner

red colour clearly indicates heat tampering attempt

"open void" message shows coldness tampering attempt

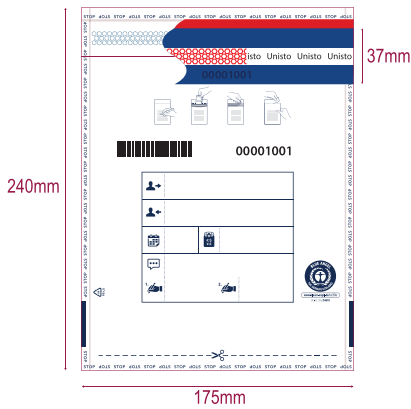

Any attempt to manipulate with solvents is clearly visible

# SAFEBAGS

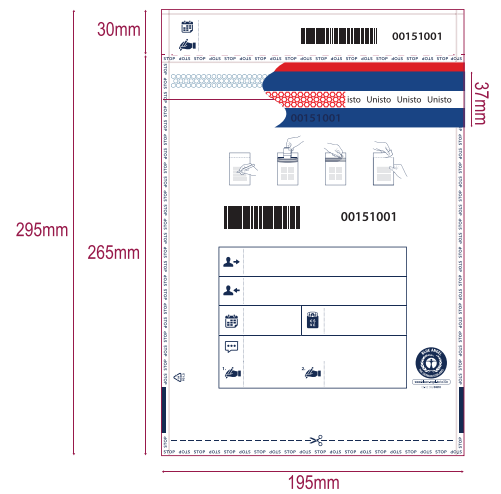

## Banknotes S transparent, 175x240 mm
